Project Description

Situated close to the thriving resort of Protaras, this project of 20 three bedroom homes offers buyers the chance to live in one of the few green areas where construction is allowed. Thanks to the build quality and design features of the Alasia Smart Homes project, these properties are able to benefit from this beautiful natural setting and low build density.

The development is located in the Kapparis resort and offers high standard customized living adjacent to green areas and other similar low-density developments. Paralimni town centre is only 5 minutes' drive away and there are plenty of supermarkets, bars, and restaurants a short walk away. The nearest beach is also within walking distance and the location offers both convenience and easy access to every amenity.

With the options of customization and roof terraces, the Alasia Smart Homes project represents outstanding value-for-money. Potential investors and owners should act swiftly if they wish to secure one of these innovatively designed and constructed homes as they are already attracting high levels of interest.
